

## Deloitte Canada Expands its Cyber Vulnerability Threat Management Offerings with Qualys VMDR

September 29, 2020

FOSTER CITY, Calif., Sept. 29, 2020 /PRNewswire/ -- [Qualys, Inc.](#) (NASDAQ: [QLYS](#)), a pioneer and leading provider of disruptive cloud-based IT, security and compliance solutions, today announced that its game-changing Qualys VMDR® (Vulnerability Management, Detection and Response) will be available via Deloitte Canada's Cyber Risk Services offering.

Deloitte Canada clients now have access to the Qualys VMDR app as part of a holistic solution to meet their Vulnerability Threat Management (VTM) requirements and provide visibility across their entire hybrid IT environment. Qualys Cloud Agents are embedded and fully integrated with the Deloitte Cyber Intelligence Center via API's to deliver asset discovery and inventory, vulnerability assessment including configuration controls, threat prioritization and patch detection to Deloitte customers.

"Providing our clients with 24-7 state-of-the-art protection is important to us, and we're pleased to offer Qualys VMDR through our Cyber Intelligence Centre," said Rocco Galletto, partner, Cyber Risk Services at Deloitte. "Qualys VMDR is a key enhancement to our offering that will help us quickly discover, assess, prioritize and patch any critical vulnerabilities that make their way to the client IT environments and be an indispensable tool as we work to help our clients solve their most complex cyber risk challenges."

"Deloitte is one of Canada's top-ranked managed security services providers known for its state-of-the-art Cyber Risk Services," said Philippe Courtot, chairman and CEO of Qualys. "With VMDR, Deloitte can now offer its clients a more holistic vulnerability and threat management solution to give them full visibility across their hybrid IT environments, drastically reducing the time to remediate or mitigate critical vulnerabilities."

### About Qualys VMDR

The game-changing [Qualys VMDR](#) app is built from the ground up to seamlessly bring together discovery, assessment, detection and response into a single cloud-based app — significantly accelerating the ability of organizations to respond to threats, and effectively prevent breaches. This workflow is accomplished from a single console with orchestration built-in – thus drastically reducing exposure time, saving precious human resources and allowing you to consolidate your stack in record time. VMDR is a pure cloud-based solution that makes deployment simple, and pricing is unique as it is asset-based, making it easier to procure.

### About Deloitte Cyber Intelligence Center

Deloitte Canada has four fully-operational Cyber Intelligence Centres (CICs) in Vancouver, Montreal, Toronto and Calgary. These centres bring together leading experts in cyber risk with state-of-the-art technology to offer a full suite of managed security services including customized, integrated services like incident response and threat intelligence around the clock.
