#### First Quarter 2022 Business Highlights

- Leveraging Qualys' single agent approach, we unveiled our Context XDR application to natively integrate and
  correlate asset and risk-based context vulnerability management, patching, EDR and File Integrity Monitoring
  security telemetry with additional third-party data integration to provide and prioritize high-fidelity threat detection and
  response.
- Continuing our innovation of Qualys Cloud Platform, we further enhanced our Patch Management offering by adding
  advanced remediation features. Qualys Patch Management seamlessly integrates with Qualys VMDR® to remediate
  vulnerabilities by deploying patches or applying configuration changes on any device regardless of its location. This
  new advanced remediation update allows teams to use one application to detect, prioritize and fix vulnerabilities
  regardless of the remediation method required and enables teams to run actions before or after or even without
  deploying patches at all.
- Introduced our next major upgrade to our Multi-Vector EDR solution. This natively integrated solution on the Qualys
  Cloud Platform leverages our single agent approach to IT security and compliance solutions to further enhance our
  threat hunting and risk mitigation capabilities. As part of this launch, Qualys successfully participated in its first year
  of MITRE Engenuity Evaluations for Multi-Vector EDR, which detected the simulated adversary throughout the attack
  chain.
- Following a successful Qualys Security Conference (QSC) held virtually and live in Las Vegas last year, we launched in Q1 our QSC roadshow in Atlanta. This is the first stop in our ten-city tour, including upcoming events in London, Chicago, New York, San Francisco and Sydney.

Our expectations and beliefs regarding these matters may not materialize, and actual results in future periods are subject to risks and uncertainties that could cause actual results to differ materially from those projected. These risks include our ability to continue to develop platform capabilities and solutions; the ability of our platform and solutions to perform as intended; customer acceptance and purchase of our existing solutions and new solutions; real or perceived defects, errors or vulnerabilities in our products or services; our ability to retain existing customers and generate new customers; the budgeting cycles and seasonal buying patterns of our customers; the length of our sales cycle; the impact of the ongoing COVID-19 pandemic and related public health measures on our business and the global economy; our ability to manage costs as we increase our customer base and the number of our platform solutions; the market for cloud solutions for IT security and compliance not increasing at the rate we expect; competition from other products and services; fluctuations in currency exchange rates; unexpected fluctuations in our effective income tax rate on a GAAP and non-GAAP basis; our ability to effectively manage our rapid growth and our ability to anticipate future market needs and opportunities; any unanticipated accounting charges; and general market, political, economic and business conditions in the United States as well as globally. The forward-looking statements contained in this press release are also subject to other risks and uncertainties, including those more fully described in our filings with the Securities and Exchange Commission, including our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q.

#### Non-GAAP Financial Measures

In addition to reporting financial results in accordance with GAAP, Qualys provides investors with certain non-GAAP financial measures, including non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP net income per diluted share, Adjusted EBITDA (defined as earnings before interest expense, interest income and other income (expense), net, income taxes, depreciation, amortization, and stock-based compensation) and non-GAAP free cash flows (defined as cash provided by operating activities less purchases of property and equipment (net of proceeds from disposal) and principal payments under finance lease obligations).

In computing non-GAAP financial measures, Qualys excludes the effects of stock-based compensation expense, amortization of intangible assets from acquisitions, and non-recurring items and the related tax effects. Qualys believes that these non-GAAP financial measures help illustrate underlying trends in its business that could otherwise be masked by the effect of the income or expenses that are excluded in non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP net income per diluted share, Adjusted EBITDA and non-GAAP free cash flows.

Furthermore, Qualys uses some of these non-GAAP financial measures to establish budgets and operational goals for managing its business and evaluating its performance. Qualys believes that non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP net income per diluted share, Adjusted EBITDA and non-GAAP free cash flows provide additional tools for investors to use in comparing its recurring core business operating results over multiple periods with other companies in its industry.

Although Qualys does not focus on quarterly billings, Qualys provides calculated current billings (defined as total revenues recognized in a period plus the sequential change in current deferred revenue in the corresponding period) to assist investors and analysts in assessing its operating performance.

Qualys has not reconciled non-GAAP net income per diluted share guidance to GAAP net income per diluted share guidance because Qualys does not provide guidance on the various reconciling cash and non-cash items between GAAP net income and non-GAAP net income (i.e., stock-based compensation, amortization of intangible assets from acquisitions, and non-recurring items). The actual dollar amount of reconciling items in the second quarter and full year 2022 is likely to have a significant impact on the Company's GAAP net income per diluted share in the second quarter and full year 2022. A reconciliation of the non-GAAP net income per diluted share guidance to the GAAP net income per diluted share guidance is not available without unreasonable effort.

In order to provide a more complete picture of recurring core operating business results, the Company's non-GAAP net income and non-GAAP net income per diluted share are adjusted for non-recurring income tax items and tax effect of non-GAAP adjustments to achieve the effective income tax rate on a non-GAAP basis. The Company's non-GAAP effective tax rate may differ from the GAAP effective income tax rate as a result of these income tax adjustments. The Company believes its estimated non-GAAP effective income tax rate of 24% in 2022 is a reasonable estimate under its current global operating structure and core business operations. The Company may adjust this rate during the year to take into account events or trends that it believes materially impact the estimated annual rate. The non-GAAP effective income tax rate could be subject to change for a number of reasons, including but not limited to, significant changes resulting from tax legislation, material changes in geographic mix of revenues and expenses and other significant events.

The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for results prepared in accordance with GAAP. A reconciliation of the non-GAAP financial measures discussed in this press release to the most directly comparable GAAP financial measures is included with the financial statements contained in

this press release. Management uses both GAAP and non-GAAP information in evaluating and operating its business internally and as such has determined that it is important to provide this information to investors.
